

Wiring Layout  
System Part Number:  
ADD60S

Description: 4-Sensor Audible Parking Assist Package with  
guidelines overlaid on monitor screen. Use with any Verity  
backup camera system.

Choose a flat place on the bumper where you will be installing the parking sensors.  
Determine the length of the bumper. Put outer sensor 12" in from outer edge. Then choose  
the places that are evenly spaced for the rest of the sensors.
